I am a construction worker seeking to move on to greener pastures in the information technology field. I have a lot of experience with computer software and hardware. In addition, I also posess leadership skills and abilities to expedite any project. I subscribe to an entrepeneurial philosophy that can see possibilities in hidden information, reform and adaptation.

Willing to relocate to: Austin, TX - Los Angeles, CA - Overseas
Authorized to work in the US for any employer

Work Experience

Handyman

Home Nirvana - Fort Worth, TX
January 2010 to Present

• Home Nirvana perfoms odd jobs such as taxi service, packing and moving, painting, demolition, landscaping, construction, woodwork refinishing, dog walking, animal sitting, house sitting, fence installation, sprinkler installation, drainage installation, french drain installation, home organization, cleaning, and make readies.

Barista

Buzzmill - San Marcos, TX
August 2018 to December 2018

• I took each customer's order, then expedited plates from the kitchen to each patron. After each patron was done eating, I bussed, and prepared each table with cutlery, and condiments.
• I made espressos, coffees, teas and alcoholic beverages.
• Helped setup stages, and sound equipment for events such as Metal Fest, Halloween Rock Fest, Movie Night, and Open Mic Comedy Night.
• Cleaning duties included, but not limited to: sweeping the property, taking out trash, cleaning toilets, mirrors, and windows. In addition, I sorted compost, recycleables, and landfill waste for pickup by Green Guy Recycling. Every component of Buzzmill's business model was compostable, recycleable, or sustainable.
• Stocked food, beer, and liquor.
• Used the Focus POS for all customer transactions.
• Checked identification cards to ensure guests are of legal drinking age.

Web Developer

Universal Bit Project - San Marcos, TX
May 2017 to November 2018

Application Name: Uni-Wallet, Unibit.io

• Helped create UniBit, which is hosted on a Virtual Private Server (VPS) with multilple nodes currently deployed. I helped write the white paper detailing the functions of UniBIT amongst other documentation designed to reach public view.
• The UniBIT Multichain platform allows for new cryptocurrency token creation within the Uni-Wallet.
• The platform serves as a digital holding company for applications that developers build upon the platform using UniBIT as a form of exchange.
• Solidified many business contacts that were currently forming their own cryptocurrencies for their own unique blockchain applications. Met with venture capitalists, and attended investor meetings showcasing blockchain applications in order to create contacts within the space. Gave presentations and plugged the UniBIT and Scout.click software applications.

Application Name: Scout.click
• This application is designed to be a totally anonymous search engine that has the ability to search the real time Clearnet and a complete blockchain repository of the entire web.
• UniBIT nodes provide a support network for the Scout.Click Inter Planetary File Sharing (IPFS) network, which is designed to compile and share a complete index of the web that includes both Clearnet https:// and Darkweb .onion addresses. Users can like and share websites in exchange for UniBITs. This provides a token incentive and gamification method to enhance the community value of the UniBIT token.
• The IPFS network functions similar to torrents in that it distributes small encrypted packets of data within the network swarm, and it takes all of that data in whole from multiple users in the swarm to reassemble the data in to whatever item was being transferred over the network.
• IPFS has no single point of failure, and nodes do not need to trust each other not to tamper with data in transit.

Application Name: Cryptit.io
• Web application that was designed to excrypt and decrypt files using SHA-256 encryption. SHA-256 is a crackable encryption protocol, but only via quantum computing, or ASIC/GPU cracking techniques.
• Users are able to privately send communications, documentation, and media around the world via email with an encrypted password required to access it.
• I coded the GitPitch presentation in GitHub Markdown language via GitHub and Atom, and created the initial graphics for the website.

Web Developer
Space Lab Maker's Space - New Braunfels, TX
May 2017 to December 2017

• This was an experiment in creating a scalable business where anyone with BitCoins could utilize the space and tools therein to create things. Participants would use AutoCad/Corel Draw to write the G-Code (RS-274) required to operate the machinery properly.
• Facility specifically focused on CNC (Computer Numerical Control), lazer etching, milling, lathing, and 3D printing.
• The space also served as a forum for weekly BitCoin meetups to add new members, software developers, potential investors, and partnerships.

Finantial Advisor
Primerica - Lake Worth, TX
June 2014 to June 2017

• Earned State of Texas Life Insurance License.

• Passed all of Primerica's product certification tests.
• I built a small team to find and capture leads and connect them to my regional vice president for processing.
• I processed client inquiries from my team and began, either the sale, or onboarding process to join Primerica as a Finantial Advisor.
• I trained new team members in ways to find and recruit new clientele. I helped them refine their marketing strategy, communication techniques, confidence to deal with rejections, and general people skills.
• Traveled to clients location and gave a presentation covering the details of any insurance policy that they were interested in adding to their portfolio.
• Attended weekly leadership, business strategy, and product update meeting at Primerica's Lake Worth, Texas headquarters.

Tax Preparer, Insurance Sales, and Marketer
Liberty Tax - Fort Worth, TX

Factom Hackathon: Blockchain Vs Paper
June 2018

The main theme of the hackathon is, "Blockchain vs Paper". How does Blockchain enable the world to bypass paper? Participants will be asked to use the Factom blockchain to create solutions using data from the Factom Blockchain instead of what would be traditionally stored on paper.

Application Name: PeachesAhead

• Developed a paperless verification application for the distribution of any product. Users can scan a QR code at a POS, or on the production line, to display data tagged to any specified unit. This ensures that units in the database are authentic, and can be sorted according to any tags, or analytics paired with each unit in the database.
• I coded the GitPitch presentation in Markdown language via Atom.
